Sector 66 Noida, UP

EDUCATION

Bachelor of Computer Applications
(BCA)

Swami vivekanand subharti university
meerut (2016 - 2019)

SKILLS

- Core PHP
- OOPs Concept
- PHP Framework
- CodeIgniter
- Laravel
- REST API
- MVC Architecture

DATABASE

- MySQL
- PostgreSQL

FRONTEND TECHNOLOGY

- HTML, CSS, Bootstrap
- JavaScript, jQuery, Ajax

TOOLS

- GitHub
- VS Code
- Sublime Text

PAYMENT & INTEGRATIONS

- Razorepay & Strip
- SMS API
- Email SMTP
- Google Map API

LANGUAGE

- Hindi
- English

SUMMARY

Software Developer with 4+ years of hands-on experience in PHP, Laravel, and CodeIgniter. Skilled in building full-cycle web applications such as E-commerce, ERP, CRM, and CMS platforms. Strong expertise in REST APIs, payment gateway integration, SMS services, Google authentication, and map-based solutions. Focused on clean code, performance, and scalable system design.

WORK EXPERIENCE

TUK Publications

Feb 2025- Present

Sr. Software Engineer

- Designed, developed, and maintained web applications using PHP, Laravel, and CodeIgniter, ensuring scalability and performance.
- Built and managed CMS platforms for digital publications, content, and user management.
- Developed and integrated RESTful APIs and third-party services, including payment gateways and SMS gateways.
- Implemented secure authentication and authorization systems (Google authentication, role-based access) and collaborated with stakeholders to gather requirements and deliver projects on time.

InfraHealth India Pvt. Ltd.

July 2023 - Dec 2024

Software Engineer

- Developed and supported healthcare-focused web applications to improve hospital and clinical operations.
- Designed and maintained Hospital Management System (HMS) modules, including patient management, billing, and appointment workflows.
- Built backend functionalities using PHP frameworks with secure, scalable database architecture and RESTful API integrations.
- Collaborated with cross-functional teams to enhance system performance, data accuracy, and overall application reliability.

Akonto Payment Solutions Pvt. Ltd

Nov 2021 - July 2023

Jr. Software Engineer

- Assisted in the development and maintenance of payment processing and fintech web applications.
- Implemented backend features using PHP, including integration of payment gateways and transaction APIs.
- Worked on secure data handling, transaction validation, error handling, and basic performance optimization.
- Collaborated with senior developers and team members on testing, debugging, deployment, and compliance with security standards.

PROJECTS

Time 2 Growmedia

time2growmedia.com

- CodeIgniter

- Developed a dynamic event management website with online event booking and promotion features.
- Built a secure admin dashboard (CMS) to manage events, bookings, users, and promotional content.
- Implemented backend logic using CodeIgniter, ensuring efficient data handling and performance.
- Integrated user-friendly workflows for event scheduling, booking management, and content updates.

ERP – Majestic Business Park

erp.majesticbusinesspark.com

-CodeIgniter

- Developed an ERP admin dashboard to manage tenants, office spaces, and rental operations.
- Implemented secure authentication and authorization with role-based access control.
- Built modules for tenant management, office allocation, and rent invoice generation.
- Developed backend functionalities using CodeIgniter, ensuring efficient data handling and system performance.

ColorJet Group

colorjetgroup.com

-Laravel

- Developed an admin console to manage printer products, customer inquiries, and sales operations.
- Built backend functionalities using Laravel for product listings, pricing, and inventory tracking.
- Implemented modules to handle offline order processing, lead management, and sales records.
- Designed an intuitive interface for managing content, customers, and business data efficiently.

Martinus Education

martinus.edu

-CodeIgniter

- Developed an educational website featuring course listings, admissions information, and student resources.
- Built backend functionalities using CodeIgniter to manage courses, content, and user data.
- Designed modules for student information management and admission workflows.
- Ensured responsive design, performance optimization, and user-friendly navigation.

TUK Publications

tukpublications.com

- CodeIgniter

- Developed a complete education management system including admin dashboard, student dashboard, and teacher dashboard.
- Implemented secure authentication and authorization with role-based access control for admins, teachers, and students.
- Built dynamic website features and dashboards using Core PHP and CodeIgniter for scalable backend processing.
- Designed and managed database structures to support users, content, and academic workflows.

KLI School

klischool.com

- CodeIgniter

- Developed a comprehensive school management system with admin, teacher, and student dashboards.
- Implemented secure authentication and authorization with role-based access control for all user types.
- Built modules for managing student records, teacher activities, and administrative operations.
- Developed backend functionalities using CodeIgniter, ensuring smooth performance and data management.

UBank Connect

ubankconnect.com

- CodeIgniter

- Developed a banking platform with a focus on secure and reliable financial operations.
- Implemented robust authentication and authorization mechanisms to ensure data security.
- Built backend functionalities using CodeIgniter, ensuring system stability and performance.
- Designed modules for managing users, transactions, and core banking workflows.

Enjerry

enjerry.com

- CodeIgniter

- Developed a freelance job portal with dedicated admin and contractor login systems.
- Implemented secure authentication and authorization with role-based access control.
- Built backend functionalities using CodeIgniter to manage job postings, contractors, and platform activities.
- Designed modules for job management, user profiles, and application workflows.
